10 years of Bringing Leaders Together to Learn, Share and Take Action

For the past 10 years, the *IAQ Tools for Schools* National Symposium has given its attendees unparalleled opportunities to network with school board officials, administrators, architects, school nurses, teachers, facility managers, school and health association members, parents, and hundreds of other school IAQ leaders and advocates at this dynamic event. Coupled with a distinguished cast of IAQ management experts and award-winning school IAQ management program faculty, the Symposium is a can't-miss event for leaders committed to school health.

Previous Symposium attendees have raved:

“The Symposium provides an unparalleled opportunity to *listen, learn and lead*. Listen to the IAQ storytellers, practitioners and champions. Learn by actively participating in sessions, networking and collaborations. Lead multifaceted, integrated and sustainable IAQ projects, initiatives and programs.”

— *Rusty Clifford, Ph.D., Superintendent, West Carrollton City Schools*

“Attending the Symposium has given us the tools we needed to cultivate a sense of program ownership among all our building occupants. This ability to get ‘all hands on deck’ for healthy IAQ has been essential not only for our program success, but for our sustainability as well. The Symposium is a game-changing event.”

— *Dave Hill, Executive Director, Facilities and Operations, Blue Valley School District*

Register Today

10th *IAQ Tools for Schools* NATIONAL SYMPOSIUM

JANUARY 14-16, 2010 • WASHINGTON, DC

Discover How to Create and Sustain Healthy Learning Environments in *Your* School District

Hands-on sessions led by world-class technical experts and peer faculty will give you unprecedented access to:

- Proven strategies that lead to successful and sustainable IAQ management programs;
- Cutting-edge information on creating and maintaining green, healthy and high-performing schools; and
- In-depth technical information and resources on addressing IAQ issues, including controlling asthma triggers, making green purchasing decisions, and funding your IAQ management program.
